

A growing name

The company Artec/Galtec covers the whole range of needs in the field of surface treatments and proposes itself on the market as an elective partner.

We make all in one place:

- Transparent or yellow chromating conversion coating for aluminium.
- Clean, pickling and passivation of aluminium
- Cadmium-plating with white, yellow and olivegreen passivation
- Copper-plating
- Electropolishing, etching or passivation of stainless steel
- Galvanic tin-plating
- Zinc or manganese phosphating with or without oil
- Brass-plating
- Electroless nickel-plating
- Galvanic nickel-plating
- Black oxidizing
- Galvanic silver-plating
- Galvanic gold-plating
- KTL (e-coat)

Galvanic zinc-plating, transparent, blue, yellow and black chrome VI-free passivation, with or without sealer (top coat), olivegreen and black.

Galvanic Zinc-Nickel alloy plating transparent chrom VI-free, yellow with or without sealer (top coat)

All process in barrels or racks.

The process control is made in our own laboratory.

Our company adopted a Certified Quality System in accordance with ISO 9001:2015. This could be reached thanks to our engagement and development in technologies during all these years.
